SUMMARY

I am an enthusiastic Applied Science undergraduate with strong self-learning and problem-solving skills. Proficient in **Java**, **Python**, **Next.js** and currently learning **n8n** workflow automation. Conducting final-semester research applying **Machine Learning** and **AI** to solve industry-relevant problems.

WORK EXPERIENCE

Software Engineering Intern (AI/ML)
Sri Lanka Telecom PLC (SLT)

October 2025 – Present

- Designed and implemented a **Sinhala-language chatbot** using the **Gemini API**, applying **Natural Language Processing (NLP)** techniques to enhance conversational accuracy and usability.
- Generated automated **text analysis and summary reports** from organizational logbook entries using **Large Language Models (LLMs)** deployed via **Ollama**, supporting internal documentation and analysis workflows.
- Currently contributing to a **frontend web development project** using **React.js**, focusing on component-based architecture and responsive user interface development.
- Collaborated with cross-functional teams following standard development workflows and version control practices.

EDUCATION

B.Sc.(Honours) in Applied Sciences (Mathematics)
University of Sri Jaywardenepura

Jul 2022 – present
Current GPA: 3.1805

Core Disciplines: Information and Communication Technology, Mathematics, Physics

G.C.E. Advanced Level, Physical Science Stream
Gothami Balika Vidyalaya, Colombo 10

2018 - 2020
Z Score: 1.2078

TECHNOLOGIES AND SKILLS

AI, Machine Learning

LLMs, Gemini API, Ollama, NumPy, Pandas, Scikit-learn, OpenCV (Learning), TensorFlow (Learning)

Programming Languages

Java, Python, C, SQL, PHP

Frameworks & Libraries

React.js, Next.js, Bootstrap, Tailwind CSS, Radix UI

Web Technologies

HTML, CSS, JavaScript, REST APIs

Databases & ORMs

MySQL, MongoDB, Prisma ORM

Automation & Tools

n8n, Git

UI/UX Designing

Figma

Soft Skills: Teamwork and Collaboration, Problem Solving, Time Management, Communication

PROJECTS

Issue Tracker | [Project Link](#) | (Ongoing Project)

- Developed a **full-stack web application** for **bug tracking**, implementing **CRUD operations**, **issue workflow automation**, and **database management**.
TechStack: Next.js, TypeScript, Tailwind CSS, Radix UI, Prisma ORM, MySQL

Abbey Atsuko | [Project Link](#) | (Group Project)

- Built a **3D holographic AI assistant** using **conversational AI**, **OpenAI GPT**, and **interactive visual avatars** to assist students with scheduling and assignments.
TechStack: OpenAI GPT, Blender(3D animation), Video Rendering, Prompt Engineering

The Healthy Seater | [Project Link](#)

- Designed a **smart embedded system** for posture monitoring with **Bluetooth-enabled Android integration**, **sensor calibration**, and **real-time user feedback**.
TechStack: Android Studio (Java), Arduino IDE (C/C++), Arduino UNO R3 and Sensors.

MaskBook | [Project Link](#)

- Developed a **dynamic web application** with **user authentication**, **content management**, and **interactive front-end features** for post creation, viewing, and deletion.
TechStack: PHP, Vanilla JS, HTML, CSS , BootStrap

Kuweni | [Project Link](#) | (Group Project)

- Built a **mobile e-commerce application** with **real-time database synchronization**, **cloud storage integration**, and **optimized media caching**.
TechStack: Android Studio(Java), Firebase Realtime Database, Firebase Cloud Storage, Picasso.

Data Driven Approach for Food Waste Management | [Project Link](#)

- Applied **machine learning models**, **data analysis**, and **clustering algorithms** to identify **food waste patterns** and provide **actionable recommendations** for inventory and portion optimization.
TechStack: Python (NumPy, Pandas, Scikit-learn), Matplotlib/Seaborn

CERTIFICATIONS

- BCS Certificate in IT - British Computer Society (UK)
- UX Design Professional Certificate - Google (Coursera)
- Advanced Web Development - Live College (Pvt.) Limited
- Web Designing for Beginners - University of Moratuwa
- Python for Beginners 1,2 - University of Moratuwa
- Supervised Machine Learning:Regression and Classification -DeepLearning.AI (Coursera - Ongoing)
- Working with the OpenAI - DataCamp (Ongoing)

ACHIEVEMENTS

Finalists - DHack24 Ultimate Designathon Challenge | [Project Link](#) | [Documentation](#)

Designed a mobile app to measure the calories of foods instantly, with the facility to locate groceries and suggest healthy meal preparations. Contributed for Empathizing, Ideating and Prototyping.
